# BUCKET

**FOR ALL MINI SKIDSTEERS**

When it comes to mini series grapple buckets, the new Timber Wolf GB-42 stands alone. Its light weight makes it easy to transport to your construction or demolition site, and its heavy duty performance can tackle any job your skidsteer can handle. Rocks, stumps, logs, timbers and concrete-virtually anything the Timber Wolf can get its jaws around, you can move safely and efficiently. From clearing the site to final landscaping, the Timber Wolf is a rugged, versatile, invaluable addition to your equipment line. Contact your dealer and find out how the Timber Wolf GB-42 can help you to take a bigger, more profitable Bite out of your next project.

## **POWER AND PERFORMANCE**

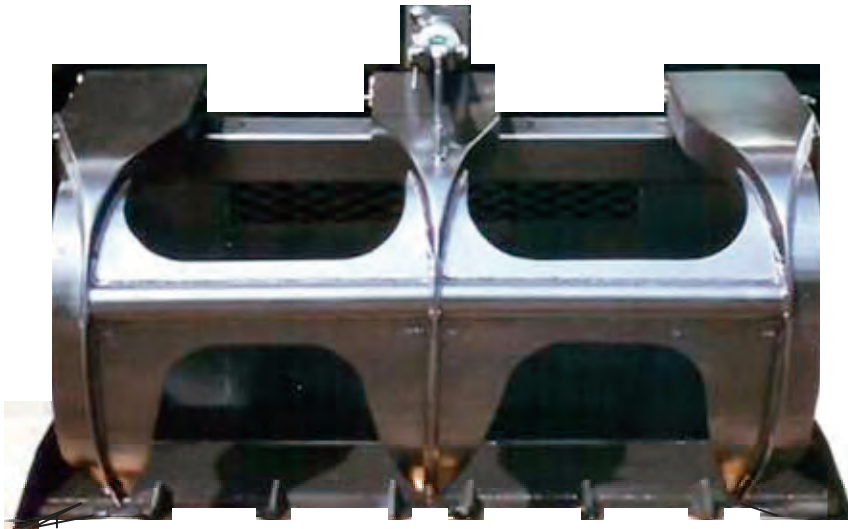

Timber Wolf with its high tensile strength steel, makes the GB-42 Grapple Bucket an ideal attachment for all mini skidsteers.

Timber Wolf's heavy duty teeth bite into hard pack with ease to lift stumps, brush, concrete, and asphalt, and holds it securely in place for transport to the dump site.
