The Vee-Force box is designed with flow and control in mind. The deep Vee design doesn't sacrifice unload performance or capacity. The aggressively angled floor puts gravity to work for you, while full weld gusset reinforced seams maximize your load and allow for full unload without material hang up. The double door design allows you to control the emptying speed for

the fastest unload without spills. Rubber mounts on the sills reduce the banging and clanging, wear and tear. The rubber hits the road with industry leading running gear designed for no sway trailing and ruggedly built for field and road service, getting there is not a question. Make sure your team wins this harvest season, get Vee-Force behind You.

# FEATURES AND OPTIONS

1

## Dual Doors

Opening the small hatch provides improved metering during unloading. Or fully open the doors when speed is preferred.

2

## Side Window

Quickly evaluate the contents and fullness through the convenient side window.

3

## Inside Ladder

Both external and the addition of an internal ladder make quick work of maintenance or inspection of your box.

4

## Slope

The increased slope of the box floor provides increased speed and consistency when unloading product.

5

## Light Kit

The optional light kit increases safety during night and road travel.

6

## Roll-Up Tarp

Protect your harvest with the optional roll up tarp. Easily secured using the equipped ratcheting straps.

*Models available in red or green.*
